

Updated Recommendations for COVID-19 PPE

For persons under investigation or positive for COVID-19:

- Standard, Contact, Airborne, & Eye protection is recommended
- Facemasks are an acceptable alternative to respirators if supply is limited
- Respirators should be reserved for aerosol generating procedures

DONNING SEQUENCE

1. Perform hand hygiene*
2. Full coverage gown fastened at the neck & waist
3. Mask or respirator as recommended
4. Goggle or face shield to cover face & eyes
5. Gloves extended to cover wrist of isolation gown

*Wash for ≥ 20 seconds or use an alcohol based sanitizer

DOFFING SEQUENCE

1. Removes gloves to avoid contamination
2. Unfasten gown at back & touching inside only pull away from body & turning gown inside out in a bundle to dispose in waste container
3. Goggles & face shields should be removed using straps to avoid contamination
4. DO NOT touch front of mask or respirator, remove grasping elastics in the back
5. Perform hand hygiene
